THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS** FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

### EXAMINER'S AMENDMENT

1. An examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

Authorization for the examiner's amendment was given in a telephone interview with Mr. Eric Prael, on March 13, 2009.

2. In the claims:

(i) cancel claim 27;

(ii) in claim 3, line 4: replace "said first-mentioned" with – the previously mentioned --;

and

(iii) amend claim 1 to the following:

1. (Currently Amended) A method implemented by a client application running on a client computer, said method comprising:

retrieving an address of a server that provides a geolocating service  
analyzes received electronic documents containing unstructured text to discover spatial identifiers contained within the unstructured text and generates for those received electronic documents geolocation information, said geolocation information identifying all spatial identifiers discovered within the unstructured text of the received electronic documents and also including geospatial coordinates for all spatial identifiers discovered within the unstructured text of the received electronic documents;

identifying at said client application a client document that includes unstructured text containing a plurality of unidentified spatial identifiers;

electronically transferring the identified client document to the address of the server providing the geolocating service; and

electronically receiving back from the server providing the geolocating service geolocation information for the client document, wherein the received geolocation information identifies all spatial identifiers among the plurality of unidentified spatial identifiers within the unstructured text and including spatial geographical coordinates for each of the identified spatial identifiers,

wherein the geographical coordinates are not found at a specific location in the document but rather is derived from analyzing the content of the document, and ~~for wherein~~ each of the identified spatial identifiers is assigned a corresponding spatial relevance level for the client document as a measure of the degree to which the document relates to the spatial location mentioned in its spatial information content.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest individually or in combination a method of providing geolocating service to a client by searching through a client-provided electronic document for spatial identifiers (e.g., street addresses, locations of physical objects) within unstructured text (e.g., plain text without explicit or implicit fields or tags) in the document. The identified spatial identifiers are then annotated with additional geographical coordinates such as latitudes and longitudes, wherein the geographical coordinates are not found in each specific location in the document. Furthermore, each of the identified spatial identifiers is assigned a level of relevance as a measure of the degree to which the document relates to the spatial identifiers.

4. In the closest prior art: Rossmann teaches using a server to extract spatial identifiers from unstructured text of a user-designated document (such as a web page); and Hancock teaches

obtaining geographical coordinates such as latitudes and longitudes corresponding to spatial identifiers. Further, it is considered well known to measure the relevance level of a keyword that is found in a document by, for example, counting the occurrences of the keyword in the document (see also Codella in US20030005038). However, it appears that adding the teachings of Hancock and Codella together would not reproduce the claimed invention because the latter is situated in a client-server service model, wherein its end product is the submitted document plus annotated geographical coordinates provided therein, while Rossmann is only interested in extracting spatial identifiers into a PIM (Personal Information Manager).

On the other hand, there are service providers providing a user with geographical coordinates in response to specific geographical information contained in a query (see, for example, Phelan: US 6240360). The invention here is distinct in that: (1) the client supplies a document without any keyword; and (2) the server needs to search through unstructured text in the client-provided document for spatial information and further match it with geographical coordinates. Thus it is believed that the prior art of record does not teach, individually or in combination, the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wen-Tai Lin whose telephone number is (571)272-3969. The examiner can normally be reached on Monday-Friday (8:00-5:00) .
